

5-Methylcytidine (M5C) Rna Rabbit Mab For Db And Elisa

Item Number: CM0000002

Introduction

Rabbit monoclonal antibody targeting 5-methylcytidine (m5C) RNA modification, validated for dot blot and ELISA. Exhibits wide predicted cross-reactivity with human, mouse, rat, and other species. Ideal for epitranscriptomics research.

Parameter	Value
Product Name	5-methylcytidine/m5C(RNA) Rabbit mAb
Remarks/Alias	m5C
Immunogen	Chemical compounds corresponding to m5C.
Source	Rabbit
Category	Other Modified Antibodies
Application	DB, ELISA
Cross Reactivity	Human, Mouse, Rat, Other (Wide Range Predicted)
Shipping	Ice bag
