

Anti-Hepatitis B Virus (HBeAg)

Item Number: HBeAg

Introduction

Discover Anti-Hepatitis B virus (HBeAg) products for LF and ELISA assays. High specificity and purity. Monoclonal antibody from mouse ascites. Order now!

Learn More

Feature	Description
Product Name	Anti-Hepatitis B virus (HBeAg)
Application	LF / ELISA
Form/Appearance	Purified from mouse ascites by protein A chromatography
Concentration	≥ 1 mg/ml
Isotype	lgG1
Clonality	Monoclonal
Purity	≥ 90%
Buffer	0.01M Phosphate Buffered Saline, pH 7.2, containing 0.1% sodium azide
Cross Reactivity	Not determined
Specificity	Hepatitis B "e" antigen
Condition	Description
Storage	2-8°C or -20°C. Avoid freeze-thaws. Maximum one freeze-thaw during storage.
Shipping	Cold packs
Shelf Life	Four years from date of manufacture
Indicator	Acceptance Criteria
Indicator Package Appearance	Acceptance Criteria Product outer packaging box, aluminum foil packaging bag should be complete and without damage.
Package Appearance	Product outer packaging box, aluminum foil packaging bag should be complete and without damage.
Package Appearance Test Strip Appearance	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly.
Package Appearance Test Strip Appearance Test Strip Width	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly. Width should not exceed ±0.20mm of the nominal value, with a nominal value of 4.00mm.
Package Appearance Test Strip Appearance Test Strip Width Migration Speed Minimum Detection Limit	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly. Width should not exceed ±0.20mm of the nominal value, with a nominal value of 4.00mm. Liquid migration speed should not be less than 10mm/min. Results should meet the requirements when tested with the HBeAg national minimum detection limit reference or the enterprise minimum
Package Appearance Test Strip Appearance Test Strip Width Migration Speed Minimum Detection Limit (HBeAg)	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly. Width should not exceed ±0.20mm of the nominal value, with a nominal value of 4.00mm. Liquid migration speed should not be less than 10mm/min. Results should meet the requirements when tested with the HBeAg national minimum detection limit reference or the enterprise minimum detection limit reference standardized by the national reference. The relative deviation of the measurement results should be no more than 20% when using the national accuracy reference or the enterprise
Package Appearance Test Strip Appearance Test Strip Width Migration Speed Minimum Detection Limit (HBeAg) Accuracy (HBeAg) Positive Reference Concordance	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly. Width should not exceed ±0.20mm of the nominal value, with a nominal value of 4.00mm. Liquid migration speed should not be less than 10mm/min. Results should meet the requirements when tested with the HBeAg national minimum detection limit reference or the enterprise minimum detection limit reference standardized by the national reference. The relative deviation of the measurement results should be no more than 20% when using the national accuracy reference or the enterprise accuracy reference standardized by the national reference as a sample. Concordance rate (+/+) should be no less than 9/10 when testing 10 HBeAg national positive references or enterprise positive references
Package Appearance Test Strip Appearance Test Strip Width Migration Speed Minimum Detection Limit (HBeAg) Accuracy (HBeAg) Positive Reference Concordance Rate (HBeAg) Negative Reference	Product outer packaging box, aluminum foil packaging bag should be complete and without damage. Clean and flat, no burrs, no damage, no pollution; material attached firmly. Width should not exceed ±0.20mm of the nominal value, with a nominal value of 4.00mm. Liquid migration speed should not be less than 10mm/min. Results should meet the requirements when tested with the HBeAg national minimum detection limit reference or the enterprise minimum detection limit reference standardized by the national reference. The relative deviation of the measurement results should be no more than 20% when using the national accuracy reference or the enterprise accuracy reference standardized by the national reference as a sample. Concordance rate (+/+) should be no less than 9/10 when testing 10 HBeAg national positive references or enterprise positive references standardized by national positive references. Concordance rate (-/-) should be 15/15 when testing 15 HBeAg national negative references or enterprise negative references standardized
