

Anti-Neuropilin-1 (Nrp1) Monoclonal Antibody For Wb, If/Icc, Elisa - O14786

Item Number: CM0002909

Introduction

Rabbit monoclonal antibody targeting human Neuropilin-1 (NRP1), suitable for WB, IF/ICC, and ELISA. NRP1 is a VEGF/semaphorin receptor involved in angiogenesis, neuronal guidance, and SARS-CoV-2 infection — ideal for cardiovascular, neuroscience, and viral research.

Parameter	Value
Product Name	Neuropilin-1 (NRP1) Rabbit mAb
Remarks/Alias	NP1; NRP; BDCA4; CD304; VEGF165R; Neuropilin-1 (NRP1)
Species	Human
GeneID (Human)	8829
GeneID	8829
Immunogen	Recombinant fusion protein containing a sequence corresponding to amino acids 22-644 of human Neuropilin-1 (NRP1) (NP_003864.5).
Source	Rabbit
Category	Monoclonal Antibodies
Application	WB, IF/ICC, ELISA
Cross Reactivity	Human
SWISS	O14786
Protein Weight	68 kDa/71k Da/103 kDa
Shipping	Ice bag
