

BrdU Mouse Monoclonal Antibody - Bromodeoxyuridine

Item Number: CM0003114

Introduction

BrdU Mouse mAb is a monoclonal antibody specific to Bromodeoxyuridine, suitable for IF/ICC and ELISA applications. It cross-reacts with all species, providing a versatile tool for cell proliferation and DNA synthesis research.

Parameter	Specification
Product Name	BrdU Mouse mAb
Gene ID (Human)	BrdU
Immunogen	Recombinant protein, Bromodeoxyuridine
Source	Mouse
Category	Monoclonal Antibodies
Application	IF/ICC, ELISA
Cross Reactivity	ALL
Shipping	Ice bag
