

Pan Dimethyl-Lysine Rabbit Polyclonal Antibody For Wb And Elisa

Item Number: CM0000215

Introduction

The Pan DiMethyl-lysine Rabbit pAb is a polyclonal antibody specific to dimethylated lysine residues, suitable for Western blot (WB) and ELISA applications. It shows cross-reactivity with human, mouse, and rat samples, enabling broad methylation research.

Parameter	Value
Product Name	Pan DiMethyl-lysine Rabbit pAb
Gene ID (Human)	pan Kme2
Immunogen	Synthetic peptide A synthetic peptide corresponding to a sequence containing dimethylated K.
Source	Rabbit
Category	Methylated Antibodies
Application	WB, ELISA
Cross Reactivity	Human, Mouse, Rat
Shipping	Ice bag
